

US Federal Automotive Vibration Compliance Standards

This document defines per-component vibration compliance thresholds under different environmental exposure tests. Each part must satisfy its respective limit.

Table 1.1 – Water Exposure Test Limits	
Part Code	Vibration Limit (mm/s)
L102	3.0
M330	4.5
X778	4.0
A450	3.0
B990	3.5

Table 1.2 – Dust Exposure Test Limits	
Part Code	Vibration Limit (mm/s)
L102	5.0
M330	4.5
X778	2.5
A450	3.0
B990	5.0

Table 1.3 – Mud Exposure Test Limits	
Part Code	Vibration Limit (mm/s)
L102	3.0
M330	2.0
X778	4.0
A450	2.0
B990	4.0

Batch-Level Rejection Rule

If more than 10% of tested components exceed their respective thresholds for a given test condition, the entire batch shall be rejected.
